

Stop losing money and start taking control of your supply chain today!

SUPPLY CHAIN COSTS REPRESENT 50% OR MORE OF REVENUE. IS YOUR SUPPLY CHAIN COSTING YOU MONEY?

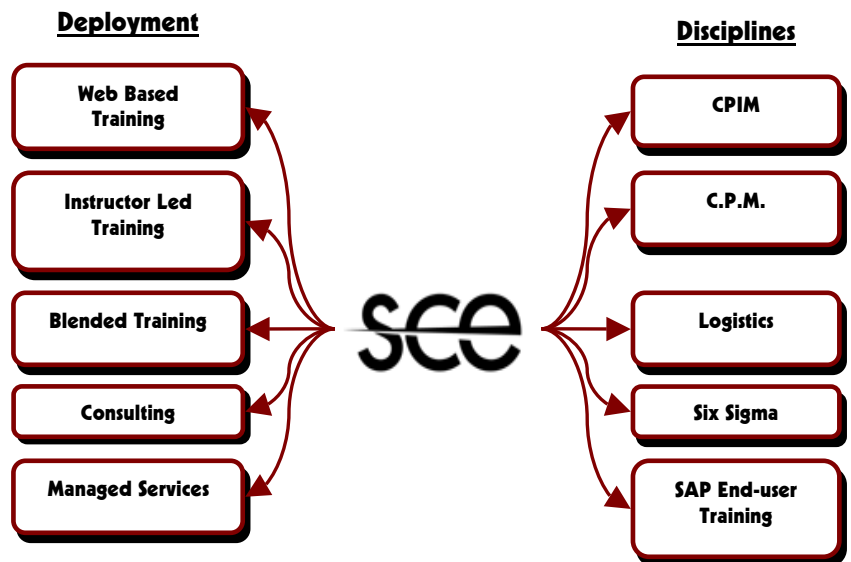

To have an efficient and effective supply chain you must have knowledgeable employees. Supply Chain Education offers a turnkey solution in training supply chain management to transform your employees into best-in-class supply chain management professionals. Whether training tactical buyers or your future VP of Supply Chain Management, SCE is your source for a premier training program.

SCE, along with Aztec Systems, has developed an educational delivery system that is scalable, cost effective and capable of supporting a large geographically disperse workforce. SCE has also developed a dynamic, multi-faceted delivery method designed to increase retention, comprehension, and application. This learning process follows a four-step methodology and utilizes study texts, slide presentations and streaming audio for delivery.

To provide a turnkey solution, SCE offers an array of services in several areas of supply chain management. SCE can provide your company with consulting to assess training gaps or needs and design a training program to address those needs.

While SCE offers ready made courses, you can have a training program tailored to a specific need from our existing courses or you can have a customized training program developed for your employees. SCE also offers services that allow companies to create their own training program, and SCE will convert the material to an online format and manage the training program.
